

# UNDERSTANDING THE PROBLEM

Prostate cancer starts in the prostate gland in men and is often diagnosed through screening while men aren't yet displaying signs. Symptoms of more advanced prostate cancer may include weight loss, bone pain, fatigue, and urinary issues.

 **~3.1 MILLION**  
men diagnosed with prostate cancer  
alive in the U.S.<sup>1</sup>

We are committed to a healthier and more equitable future for men. Advocacy is essential in our quest to transform healthcare.

Our purpose is resolute and fueled by the opportunity to improve the lives of millions of men, delivering empowering medicines for prostate cancer through purpose-driven science and transformative advocacy. [Learn more at myovant.com](https://myovant.com).

**~268K**

new cases of prostate cancer in the U.S. in 2022<sup>2</sup>

**1 in 8**

men will be diagnosed with prostate cancer in their lifetime<sup>2</sup>

Black men have the highest prostate cancer mortality rate,

**~2x**

higher than white and Hispanic men<sup>3,4</sup>
